Client Industry:
Education

What we deliver:
Risograph – Digital Print Production System

Introduction

Danson Primary School is committed to ensuring their pupils are well prepared for the next stage of their education.

Based in Bexley in Kent, Danson Primary School expects high academic achievement, encouraging creativity by catering to a personalised approach to learning.

Their team of dedicated, hardworking and committed teaching staff deliver exciting approaches to learning and teaching, ensuring that their pupils have a broad and balanced range of opportunities by which to foster the development of positive, responsible attitudes towards learning alongside the development of personal and social skills.

Key Results

- > Increased staff productivity by introducing 'follow me' solution
- > Improved operating efficiency
- > Reduced print waste
- > Reduced printing costs

The Client's Challenge

Danson Primary School wanted to reduce the costs associated with their laser print fleet.

Using a fleet of obsolete and slow laser printers, the primary school found that documents were being printed but not collected, leading to print waste.

Due to the age of the devices they were using, the school found that their printers were slow and unreliable, and no longer suitable for their needs. Moreover, management found that simple tasks, such as making booklets in preparation for lessons, were taking up staff's valuable time, leading to operational inefficiency.

Our Solution

We assessed Danson Primary School's laser print infrastructure and recommended that the school switch to Risograph's digital print production system.

Risograph's unique technology includes low cost per page, high printing speeds, controlled quality output and exceptional reliability.

In addition, we implemented the 'follow me' solution for the school, meaning that any documents printed can only be picked up by the appropriate, and correct, member of staff.

We added Risograph's stapling and folding finishing solution, automating processes for the primary school.

Results

As a result of installing Risograph's digital print production system, Danson Primary School have reduced their laser printer costs.

Thanks to the high speed of the Risograph print fleet, staff now spend less time at the printer. Furthermore, due to the 'follow me' solution implemented, staff can now email documents from home and collect them in the morning, reducing the amount of paper wasted.

The stapling and folding finishing solution installed has reduced the amount of time staff spend on making up booklets for lessons, improving operations in the school.

“ Ethos have enabled our staff to be more productive and freed our teachers to spend more time in classes, and less time preparing lessons. We have also reduced the amount of wasted prints thanks to the follow me print solution introduced ”

IT Manager, Danson Primary School

Improving your communications

At Ethos, we have over twenty years' experience delivering services and solutions across the three main forces of business communications: voice, documents and data.

4,000 customers worldwide regard us as part of their extended team – a single contact point for their managed print services, telephony systems, mobile networks and IT.

Over the years we've remained independent because it's the best way to deliver what our customers need – a bespoke service offering independent advice across all of the leading providers including Xerox, Mitel, Cisco, Microsoft, BT, Vodafone, O2, Konica Minolta and HP.

So, whether you're looking for a single point solution or for unified communications partner across your business, we're the experts.
